PROFESSIONAL SUMMARY

Results-driven Full Stack & DevOps Engineer with 3+ years of hands-on experience designing, building, and deploying end-to-end web applications across the full software development lifecycle. Proficient in React.js, TypeScript, Node.js, Express.js, and Java on the backend, with deep experience in RESTful API design, microservices architecture, and SQL/NoSQL databases. Strong DevOps mindset: experienced in AWS cloud infrastructure (EC2, Lambda, S3, RDS), Docker, Kubernetes, and CI/CD automation with GitHub Actions. Delivered production systems in healthcare, university administration, POS, and IoT domains. Passionate about engineering clean, scalable software that drives real business impact.

PROFESSIONAL EXPERIENCE

Programmer Cum System Analyst

University of Jaffna | May 2025 - Present

- Developed MyUOJ, a full-stack student enrollment system using React, Node.js, and Express.js.
- Implemented microservices architecture and designed MariaDB database models for scalable data management.
- Built CI/CD pipelines with GitHub Actions and deployed applications using Docker.
- Collaborated with teams to deliver user-focused features and improve system workflows.
- Automated enrollment processes with role-based access control, reducing manual operations.

Software Engineer (Part time)

Velxgen | Mar 2024 - Present

- Developed VELX-POS, a full-stack POS system using React and Laravel for sales and inventory management.
- Designed RESTful APIs and modular backend architecture for scalable system development.
- Built responsive interfaces for real-time billing and product management.
- Implemented secure authentication and role-based access control for multi-user environments.
- Worked with team members to translate business requirements into functional software features.

Intern Software Engineer (Part time)

Velxgen | June 2023 - Mar 2024

- Contributed to full-stack feature development on VELX-POS as an intern, working across React.js frontend components and Laravel backend CRUD endpoints under senior engineer mentorship.
- Built initial product listing UI and assisted in connecting frontend views to REST API responses, learning end-to-end data flow in a production codebase.
- Wrote and tested basic database queries for product and inventory tables, learning SQL best practices through iterative code review.
- Participated in Agile sprint planning, stand-ups, and retrospectives, gaining practical exposure to professional software delivery within a product team.

TECHNICAL SKILLS

- Programming Languages:** Java, JavaScript (ES6+), TypeScript, Python
- Frontend Technologies:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- Backend Technologies:** Node.js, Express.js, RESTful APIs, Microservices Architecture
- DevOps & Cloud:** AWS (EC2, Lambda, S3, RDS), Docker, Kubernetes, GitHub Actions (CI/CD)
- Databases:** MySQL, PostgreSQL, MongoDB, MariaDB, Firebase
- Tools:** Git, GitHub, Linux, VS Code
- Methodologies:** Agile/Scrum, Code Review, Technical Documentation
-

KEY PROJECTS

Appointment Booking System | Feb 2025 - Apr 2025

- Technologies : React.js, Node.js, Express.js, MYSQL, Tailwind CSS and JWT
- Built a real-time booking system with role-based access and RESTful API integration.
 - Integrated MySQL database and optimized API endpoints for performance and scalability.

Gynecology Ward Management System (Final Year Project) | Nov 2023 - Oct 2024

- Technologies : React.js, Node.js, Express.js, MYSQL, Tailwind CSS and JWT
- Developed a full-stack hospital management system with secure JWT authentication.
 - Designed RESTful APIs for managing patient records, appointments, and operations.
 - Built a responsive frontend and deployed the system to improve hospital workflow efficiency.

Personal Portfolio Website | Aug 2024 - Nov 2024

- Technologies : React.js and Tailwind CSS
- Developed a responsive, modern portfolio site showcasing projects and technical expertise.

Complaint Management System | May 2023 - Aug 2023

- Technologies : HTML, CSS, PHP and JavaScript
- Developed frontend interface for university complaint management system as frontend developer
 - Collaborated with backend team to integrate APIs and ensure seamless data flow
 - Created automated workflows to efficiently handle student and staff grievances
 - Ensured responsive design and cross-browser compatibility

Room Temperature Controller | Aug 2023 - Sept 2023

- Technologies : Tinkercad, Arduino IDE and C programming
- Created an automated IoT system for temperature regulation with embedded sensors.
-

EDUCATION

- Bachelor of Science in Computer Science** University of Jaffna | Oct 2021 - Dec 2024
- Effective Date - Dec 2024
 - Graduated - Feb 2026
- Primary & Secondary** Km/Wesley High School Kalmunai | Jan 2005 - Aug 2019
- G.C.E. A/L Physical Science : B 2C
 - G.C.E. O/L : 2A 4B 3C
-

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

GeSSoMI Summer School – AI & Machine Learning

- Google Research, University of Melbourne, University of Jaffna – 2024

AI Horizons: Real-World AI Applications

- Google Research Award, University of Jaffna - 2024

Google exploreCSR Symposium – AI Research

- Department of Computer Science, University of Jaffna - 2024

Mastering Deep Learning (Hands-On)

- IEEE Computer Society - 2024

IEEE Summer School on Computational Intelligence

- IEEE Computational Intelligence Society – 2023

Sri Lanka Student Workshop on Computer Science (SL-SWCS'23)

- University of Jaffna - 2023

Research Methods in Computer Science: Theory and Ethics

- University of Jaffna - 2023
-
